

What's new in EDMS?

As of 9/1/2011, the EDMS search field labeled Division will be replaced by a field labeled Function. This field contains a searchable list of all the functions that DEQ performs.

All documents in the EDMS are assigned to only one function.

Documents dated before 2001 may be assigned to a function called "Unassigned". If you are looking for documents dated before 2001 and you are using the function field to search, be sure that you include the Unassigned function in your search. For example, when looking for Remediation Services documents dated before and after 2001, select both Remediation Services and Unassigned as shown below. To select multiple items in any EDMS pick list, hold the CTRL key and click to select each item.

Below is a list of all functions in the EDMS:

Air Emissions Inventory	Non-point Source
Air Modeling	Office of the Secretary (OSEC)
Air Monitoring and Analysis	Outreach
Air Planning	Permit Support Services
Air Stack and Tank Testing	Permits
Aquifer Evaluation and Protection	Radiological Emergency Planning
Chemical Accident Prevention	Radiological Services
Conformity Analysis	Radiological Transportation
Contracts & Grants	Remediation Services
Enforcement	Solicitation of Views
Financial Services	State Revolving Fund
Incidents – Emergency	Unassigned
Incidents – Non-Emergency	Underground Storage Tanks
Information Services	Vehicle Inspection Maintenance
Inspections	Water Quality Standards and Assessment
Lab Accreditation (LELAP)	Water Quality Total Maximum Daily Loads (TMDLs)
Legal	

For assistance with this or any other EDMS feature, please contact edmsquestions@la.gov.

Division	EDMS Division	Function
Documents for the current division:	which have been listed under one of these divisions in the EDMS:	will be assigned to this new Function:
Air Permits	Air Quality Assessment	Air Emissions Inventory
	Air Quality Assessment	Air Planning
